Our clients company is **an exciting new start-up in the field of RFID/NFC in Graz** – with huge upside potential and big-player engagement the company is growing. Therefore we are searching for experienced collegue/s as

Analog/Mixed-Signal IC Designer (f/m)

As an analog/mixed-signal design engineer, you are responsible for leading the development of the analog part of integrated circuits for RFID/NFC, Mobiles, Wearables and IoT-Applications.

Your tasks and responsibilities:

- Define design concept; transistor-level design and verification
- Floor planning, pinning, top-level evaluation
- Modeling of analog circuits by means of Verilog or VHDL; Design for testability
- Technical communication with customer; strong interaction with off-site design teams
- Design and Layout reviews; layout-support
- Lab-evaluation and characterization

Your profile:

- Degree in the field of electronic engineering
- At least <u>8 years' experience</u> in analog mixed-signal circuit design, preferably in the area of RFID/NFC
- Strong knowledge in analog design flow and development tools such as Cadence ADE
- Fluent in English – German skills are a plus

We offer an attractive competitive compensation according to your qualifications and experience. This position is in accordance with the collective agreement for employees within engineering companies, employment group V: www.ingenieurbueros.at/verband/de/kollektivvertrag
A higher payment is negotiable depending on your expertise and skills.
Additional we offer a profitable Equity Participation package.
